

Digital Mentor resources

Good Things
Australia

The Good Things website

What you can do/find:

- Digital mentor resource library
- Learner library
- Program & grants info
- Good Things news

[View resource](#)

Managed by Good Things, this website offers a wealth of support resources for Digital Mentors.

Under the Support Others to Learn tab, you can access hundreds of free resources across all our programs to help you get started. These include ready-made session plans, guides, icebreakers and activities to help you hit the ground running.

The Learner Library tab contains free resources for learners and links to the [eSafety Be Connected site](#), which is managed by the Office of the eSafety Commissioner. This site can be a useful tool for your learners to use during digital skills sessions.

We regularly update our resource libraries. To stay informed about new releases, you can subscribe to our fortnightly newsletter or contact us directly through our website.

my.GoodThings site

What you can do/find:

- Join the network
- Manage grants
- Register learners
- Update organisational details

[View resource](#)

The my.GoodThings site is also a part of Good Things and it's where you can log in to:

- Join the network
- Apply for a grant
- Register learners
- Update your organisation details and contact people.

If you want to learn more about any of these topics or how to use this site, we recommend joining Good Things free webinars or looking at our how-to resources.

Be Connected website

What you can do/find:

- Free online learning
- Videos, courses, podcasts, games, articles
- Online safety embedded

[View resource](#)

The Be Connected site is packed with learning content for your learners to use during sessions. You can easily filter topics by subject, device, content type and level. Plus, if learners choose to log in, the site will track their progress and award certificates of completion.

Courses range from absolute basics like using a keyboard and mouse to more advanced topics such as online shopping and tracing family history. This is also where you can access the accessibility courses mentioned earlier.

To help learners test their new skills, the [games and practice area](#) provides the perfect space to put their knowledge into action.
