

Digital banking with confidence

Online banking is simply a way to manage your money safely using your computer, tablet, or smartphone instead of walking into a local branch. It allows you to check your balance, pay bills, and transfer money at any time. Knowing how to use these tools is incredibly important because it gives you back your independence and helps you keep a much closer eye on your finances.

Because there are so many different banks and credit unions across Australia, every banking app and website looks a little bit different. The learning content provided may not be a one size fits all guide, but it is enough to cover the foundations of what is needed. If you want more information for your specific bank, you can visit them or their websites for more information.

If you are looking for an excellent place to start, the [Be Connected website](#) is an incredible free resource. There is an abundance of resources that can be used if you navigate to the site and search for "online banking" in their search bar.

To help you get started, here are some direct links for things you can check out:

-  [Getting started with online banking](#): An online course that helps you find out about online banking and how you can stay safer while banking online.
-  [Online banking basics practice area](#): Practise banking tasks in a safe practice environment.
-  [Managing payments online practice area](#): Practise more advanced banking tasks in a safe practice environment.
