

How to talk to AI

Easy Read

Good Things
Australia

AI means artificial intelligence.

**It uses computers to do things
that needed humans before.**

Asking AI to do something for you is called prompting.

**Prompting is like giving
someone instructions.**

**The clearer your instructions are,
the better the AI can help.**

Start by telling the AI exactly what you want it to do.

Tell the AI who it should pretend to be and how you want the task to be done.

For example, you can ask it to pretend to be a teacher and to talk to you in an easy to understand way.

**Remember to check the answer
with someone you trust because
AI can sometimes make
mistakes.**

Do not share personal information like your home address or bank password when asking AI for help.
