

Using AI apps to translate

Easy Read

Good Things
Australia

**Learning a new language or
writing in English can be tricky.**

**AI tools on your phone or
computer can act like a
translator.**

They can explain hard words or check your spelling before you send a message.

They can also change the language for you.

**You can use apps like ChatGPT,
Gemini or Claude.**

**You can type your words
straight into the app.**

Or you can copy text from a website and paste it into the app.

You can also choose a photo with text in it for the AI to translate.

AI can sometimes get things wrong.

**Always check important
information with someone you
trust.**
